## Los Alamos County Council

*Proven Knowledge and Experience for Our Future*

❖ Experience ❖ Energy ❖ Responsive ❖ Accessible

### A Strong Desire to Serve YOU!

- 30 years local community service
- 25 years experience in local government
- Supports protection of our small-town, family-oriented community and its environment
- Supports local businesses through well planned, targeted economic development

Throughout Ken's years of public service, he has supported issues that benefit our community as a whole, not just special interests. He has had the foresight to look beyond today and toward our future. Too often, politicians do not look beyond the next election. Ken does not believe in that approach.

Ken has the critical ability to tune into citizen feelings, opinions, and concerns. These form the issues within our community that each councilor must address. So, what are those issues? Here's what Ken hears:

- ❖ The community must have a Council that behaves with professionalism and civility. Its proceedings must be open and citizens must not feel intimidated when speaking at its meetings.
- ❖ We need a Comprehensive Plan that incorporates public input and real community goals. The plan must be implemented in a fair manner that protects or enhances the characteristics of our community that we cherish: safety, family, environment, recreation, etc.
- ❖ We must improve economic vitality in a manner that does not deteriorate our quality of life but enhances it. We must find creative ways to tap into our current population, commuters, and tourism to increase customer traffic and business activity.
- ❖ The County must always be fiscally responsible but, until the current situation at Los Alamos National Laboratory stabilizes, we must be exceptionally diligent with budgets and expenditures.
